DETAILED ACTION

Page 2

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121.

A. Claims 1-13,16-31, drawn to a micromechanical apparatus having one or more

electronically structure, classified in class 359, subclass 295.

B. Claims 14-15, drawn to a method for controlling the reflection of light from a

plurality of reflective surfaces positionally controlled by an array of micromechanical actuators,

classified in class 438, subclass 50.

Inventions A and B are related as subcombinations disclosed as usable together in a

single combination. The subcombinations are distinct from each other if they are shown to be

separately usable. In the instant case, invention B has separate utility such as applying a potential

to each of said first and second electrodes by selective activation of electrode segments thereof

according to an intended displacement in a manner to linearize a transfer function between said

potential and said displacement. See MPEP 806.05(d).

In the case that Group A, claims 1-13,16-31 is elected, this group of claims has following

patentably distinct species of the disclosed invention.

Species A, Figs. 1A,1B,2,3A,3B

Species B, Fig. 4

Species C, Figs. 5,7

Application/Control Number: 10/506,654

Art Unit: 2826

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for

prosecution on the merits to which the claims shall be restricted if no generic claim is finally

held to be allowable. Currently, none of claim is generic.

Applicant is advised that a reply to this requirement must include an identification of the

species that is elected consonant with this requirement, and a listing of all claims readable

thereon, including any claims subsequently added. An argument that a claim is allowable or that

all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of

claims to additional species which are written in dependent form or otherwise include all the

limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after

the election, applicant must indicate which are readable upon the elected species. MPEP §

809.02(a).

2. Because these inventions are distinct for the reasons given above and have acquired a

separate status in the art as shown by their different classification, the fields of search are not co-

extensive and separate examination would be require, restriction for examination purposes as

indicated is proper.

Page 3

Application/Control Number: 10/506,654

Art Unit: 2826

3. Applicant is advised that the response to this requirement to be complete must include an

election of the invention to be examined even though the requirement be traversed (37 FR

1.143).

4. Any inquiry concerning this communication or earlier communications from the

examiner should be directed to TAN N. TRAN whose telephone number is (571) 272-1923. The

examiner can normally be reached on 8:30-5:00PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's

supervisor, NATHAN FLYNN can be reached on (571) 272-1915. The fax phone number for

the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent

Application Information Retrieval (PAIR) system. Status information for published applications

may be obtained from either Private PAIR or Public PAIR. Status information for unpublished

applications is available through Private PAIR only. For more information about the PAIR

system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR

system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would

like assistance from a USPTO Customer Service Representative or access to the automated

information system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.
